Dick Vet Equine Care Plan

The Royal (Dick) School of Veterinary Studies has been offering specialised equine veterinary care since 1823.

Our equine practice offers excellent equine veterinary care.

We can provide all services, including routine vaccinations and dental work, pre-purchase examination, on-farm radiology, ultrasound and endoscopy with the backup of the equine medicine and surgery specialists at the Dick Vet Equine Hospital.

So whether your horse requires a vaccination, or major surgery, we can give your horse the very best of care and attention.

Preventative Care Prevents Big Bills

Joining our care plan will save you money and keep you safe in the knowledge that you are doing the best for your horse.

It allows you to budget for all your horse's routine preventative health care in a cost-effective manner whilst also allowing potential health problems to be picked up at an earlier stage. This is important as early diagnosis often means problems are easier to treat.

The complete package of veterinary care and advice will include checks on your horse's eyes, heart, lungs, teeth, skin, assessment for lameness including a trot up (if appropriate) and foot balance.

This is also an excellent chance to discuss with your vet any queries you have, such as weight control, worming and diet management.

What Do You Get?

Our health care plan includes:

- Annual vaccination (flu and/or tetanus), plus microchip (if required)
- Two full health checks per year, including free visits
- One dental exam and routine treatment (excluding sedation)
- Parasite control programme comprising of four faecal egg counts and one tapeworm test per year

Other Benefits

- Competitive monthly payments
- Saving you money on your routine veterinary costs

Join today - your horse will thank you!
