## EASTER BUSH SCIENCE OUTREACH CENTRE

| Research question    |  |
|----------------------|--|
|                      |  |
| Hypothesis           |  |
|                      |  |
|                      |  |
| Independent variable |  |
| Dependent variable   |  |

## **Constants**

| Trial 1 – use a random value of the independent variable |  |          |           |         |          |         |  |  |
|--|--|----------|-----------|---------|----------|---------|--|--|
| Independent variable value:                              |  |          |           |         |          |         |  |  |
| 1  | 2  | 3        | 4         | 5       | Mean     | St.Dev. |  |  |
|  |  |          |           |         |          |         |  |  |
|  |  |          |           |         |          |         |  |  |
| Trial 2 -  | - use a hi   | gher val | ue of the | indener | ndent va | riahle  |  |  |
|  | Trial 2 – use a higher value of the independent variable Independent variable value: |          |           |         |          |         |  |  |
| 1  | 2  | 3        | 4         | 5       | Mean     | St.Dev. |  |  |
|  |  |          |           |         |          |         |  |  |
|  |  |          |           |         |          |         |  |  |
|  | '  |          |           |         |          | '       |  |  |
| Trial 3 -  | Trial 3 – use a lower value of the independent variable                              |          |           |         |          |         |  |  |
| Independ   | Independent variable value:  |          |           |         |          |         |  |  |
| 1  | 2  | 3        | 4         | 5       | Mean     | St.Dev. |  |  |
|  |  |          |           |         |          |         |  |  |
|  |  |          |           |         |          |         |  |  |
